**For centuries, humankind have placed their trust in gold as a key source of value. As a hedge against inflation and in times of economic uncertainty, physical gold has the unique ability to retain its value.**

Since 1967, the Krugerrand, as a gold bullion coin, has pioneered enduring value for discerning investors. With over 52 million ounces of Krugerrand's sold, the Krugerrand is the world's most traded and trusted gold bullion coin. With a durable composition, timeless design, proven tradability, global liquidity and consistent delivery, the Krugerrand is the ideal gold bullion coin investment.

As a legal tender gold coin, denominated in ounces of pure gold, the Krugerrand is the only bullion coin that is conceptually worth its weight in gold. Containing 11/12 24 carat gold and 1/12 copper the Krugerrand offers a resilient 22 carat gold investment. Available in four sizes containing exactly 1oz, 1/2oz, 1/4oz or 1/10oz of pure gold, the bullion Krugerrand offers the kind of accessibility that few other coins do.
